

Index to Vertical Files

The Vertical Files, or clipping files, consist of newspaper and magazine articles and some miscellaneous material on a variety of British Columbia subjects. These files were created and maintained until 1980, and then microfilmed in 1988.

This index is an alphabetical list of the titles together with the microfilm reel and frame number. To use this index, find the subject, person, or organization you are interested in from the list, and identify the reel and frame number. Find the corresponding reel onsite in the BC Archives reference room. The frame numbers on each reel will be sequential.
