**FACTS**

**HISTORY OF THE FUR TRADE**

In Europe in the early 1800s demand for fur was high, mostly to make fancy hats. The most valuable fur-bearing animals, such as beaver, lynx and marten, come from the coldest climates. Competition from fur trading made explorers and fur traders seek out more remote places to find more furs. Look around, how do you think people travelled in these cold remote areas?

**FORT SUPPORT!**

Take a look at the beams of wood around the *Fort Victoria Diorama*. They are the original beams from the old fort!
